Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

In reply to the CRF Diskette Problem Report mailed 4/29/99, Applicants hereby submit a substitute CRF and substitute paper copy of the sequence listing which are believed to be fully compliant with the Trilateral Rules.

The amendments to the paper copy of the sequence listing involve the addition of entries under numeric identifier <202> through <223> to each of the sequences. Support for these entries, with the exception of SEQ ID NO: 11, can be found in the text. SEQ ID: 11 is an amino acid sequence comprising a portion of the predicted amino acid sequence for SNAP-25; as can easily be determined by performing a homology search of the sequence using one of a number of publicly available databases, such as the National Center for Biotechnology Information (NCBI) Entrez BLAST free Internet database. All of these sequences existed in the sequence listing of the application as originally filed.

The data contained in the substitute CFR is identical to that provided in the substitute paper

Additionally, please note that the Attorney Docket Number of this CPA application has changed from ALRGN.054CP1 (the Docket No. of the parent application) to 17044CPA(AP). Although the document", submitted by the Examiner having a footer "substitute PTOL90" made note of the correct docket number, the Office Action cover page did not. Applicants respectfully draw the Assistant Commissioner's attention to this fact in order to avoid confusion in the future.

As this communication is being filed before the expiration of one month after the mailing date of the CRF Diskette Problem Report, no fee is thought due. However, if Applicant is in error in this regard, please use our Deposit Account No. 01-0885 for the payment of any fees that may be due.

Respectfully Submitted,
